

GNPC Automates Facility Bookings with INFINION, Boosting Efficiency

CHALLENGE

The Ghana National Petroleum Corporation's facility booking process was manually done by the various room & equipment managers without providing adequate visibility to the employees and managers. This made the entire process cumbersome to track and difficult to manage effectively. INFINION propositioned an automated facility booking process.

SOLUTION

- A portal for employees to book available rooms and equipment for their meetings and functions.
- Automated facility request notification to managers and employees.
- Automated facility request approval process.
- PowerApps solution for the managers to review and action requests.
- Automated data collection and reporting with Microsoft Power BI

RESULTS

- A facility booking solution for rooms and equipment.
- Automated facility booking process
- 90% time saved on monthly reporting for all facility room and equipment requests
- More data visibility and process efficiency
