

GRA Streamlines Data Access and Decision-Making with INFINION's Analytics Solution

CHALLENGE

Ghana Revenue Authority was experiencing some pain points. There was an unavailability of organization data to track histories. The process to data sharing took a very long time. This led to the organisation experiencing a loss in Tax Revenue generation.

SOLUTION

How INFINION stood up to the challenge:

- Built an analytics solution that is connected to all the involved ministries to extract data.
- Provides manual and API interface for data sharing
- Build Power BI report to analyse historical data and automate report delivery
- Build analytics for forecasting tax revenue

RESULTS

- Automated data sharing platform
- Data driven decision making
- 45% increment in tax revenue gen
