

# Mobile & Web Application Development for a Leading Nigerian Fintech

## CHALLENGE

A leading Nigerian FinTech sought to modernize their operations and deliver a seamless, user-friendly experience to their customers. They required a robust, scalable, and secure platform that could handle a large volume of transactions and provide real-time insights into their business.

## SOLUTION & RESULTS

- **Mobile App:** A user-friendly mobile application for iOS and Android devices, enabling customers to manage their finances on the go.
- **Web Portal:** A secure web portal for accessing account information, making transactions, and utilizing advanced features.
- **Backend Infrastructure:** A scalable and reliable backend infrastructure powered by Microsoft Azure, ensuring high availability and performance.
- **Integration:** Seamless integration with existing financial systems and payment gateways to provide a unified experience.
- **Security:** Robust security measures to protect customer data and prevent unauthorized access.

## AT A GLANCE

### COUNTRY

Nigeria

### INDUSTRY

Financial Services

## BUSINESS AREA

Data and AI

## SOLUTIONS

- Logic App
- Azure Monitor
- Azure OpenAI
